

**William Dale Carter, M.S.**

---

Organization: International Pharmaceutical Excipient Council of the Americas  
Alexandria, VA

Presentation: Excipient Technologies and Opportunities in Combating Economic  
Adulteration  
Adulteration and Contamination: Technologies of the Future  
Tuesday, September 22, 2008; 1:00 p.m. to 4:30 p.m.

Dale Carter is the Chair Elect for the International Pharmaceutical Excipient Council of the Americas and the GMP Committee Chair. He is the Global Director of Quality for the Huber Engineered Materials Silica Business Unit. He is responsible for quality systems, product quality and compliance with IPEC/PQG GMPs for the manufacturing of Silica products at facilities in United States, India, Finland, and China.

Prior to joining Huber he was the Manager Product Quality and Management Systems in the Office of Compliance and Ethics for the Archer Daniels Midland Company where he supported processing and business operations in the development and improvement of quality management systems to ensure sustainable quality, regulatory compliance, effective risk management, and customer satisfaction. With ADM he supported excipients, bulk APIs, food ingredients, dietary supplement ingredients, biofuels, animal feeds, and specialty grains products.
