

USP International Excipient Workshop

July 20 - 21, 2009

USP Headquarters, Rockville, Maryland

USP Meetings Center

PRESENTATION ABSTRACT

Title: USP Verification Program for Excipients

Author: V.Srini Srinivasan, Ph.D.
Vice President, Verification Program, USP

Abstract : USP launched a verification program for excipients two years ago and to date several excipients have been verified. The rigorous program involves GMP audit of the manufacturing sites, Chemistry Manufacturing and Control documents (CMC), and testing for conformity to standards . Manufacturers who meet the requirements are given the right to display USP Verified Mark on ingredients labels. This assures the end users namely dosage form manufacturers that the excipient that displays the USP mark was manufactured under GMP conditions and thus consistency in quality can be expected.
