

USP Quality Review No. 82

A Publication of the USP Center for the Advancement of Patient Safety

Look-Alike and/or Sound-Alike Product Errors

During the timeframe 2003-2006, USP identified 1,470 unique drugs implicated in look-alike and/or sound-alike medication errors from the MEDMARX® and USP-ISMP Medication Errors Reporting Program. These drug names contributed to more than 3,170 pairs and each drug is listed along with the other drug involved in the mix up. ***Bold Italics*** are brand names. These drug names and corresponding error categories are available in the MEDMARX Data Report at <http://www.usp.org/products/medMarx/>
