Debt Detail

USP Programs and Products Impact Millions Worldwide Each Year

Our standards help ensure that over **300MM¹ people worldwide have access to high quality prescriptions medications—** with our **reach extending well beyond “Rx,”** through our food, dietary supplement, herbal and OTC standards:

- ▶ Over **5,900** monographs published, covering pharmaceuticals, food ingredients, herbal medicines, and dietary supplements

- ▶ **More than 3,400** Reference Standards available in the catalogue
- ▶ Standards used in **140+** countries and legally recognized in **39+**

1. Assumptions: totaled population of countries that legally recognize USP's standards, reduced by the percent that takes prescription drugs, the generics penetration rate, and USP's coverage rate of generic drugs within the top 200 drugs sold. For non-U.S. countries, affected population was further adjusted to reflect USP's reduced penetration.

USP Programs and Products Impact Millions Worldwide Each Year

- ▶ Through our PQM, TAP, and CePAT programs, we have **increased access to quality medicines in 35+ countries**

- ▶ **Our education programs train over 6,000 professionals worldwide per year**
