

## ... and countries input is part of the process!

- From the three main processes occurring at dispensing facilities (receiving the product, managing the product within the facility, dispensing the product), which is the area that you consider in need for further strengthening in your jurisdiction?
- In your economy, do you think that public sector dispensing facilities personnel have the necessary resources to address the quality needs and develop quality measures and procedures?
- Do you think that in your economy the quality needs for compounding in pharmacies are properly addressed?
