Offer valid through April 30, 2015, is non-transferable and is not applicable on prior purchases or for distributors/resellers.

Establishing the Identity and Quality of Botanical Dietary Ingredients – The Potential Role of DNA-based Methods Amongst Others

The New York Attorney General letter of February 2, 2015 to major retail stores to "cease and desist" supply of several store brand botanical dietary supplements (read NY Times article) brought renewed attention to a familiar discussion on how to ensure the identity and quality of such products. As of this article, no information has been publicly shared by the Attorney General or the targeted manufacturers about the scientific validity and fitness for the purpose of the methods they used for assessing the identity and quality of the dietary supplements in question.
