Stakeholders Discuss Path Forward for Probiotics Standards

USP hosted a roundtable discussion to seek stakeholder feedback on the development of future USP dietary supplement standards for probiotics on November 20, 2015 at the USP site in Rockville, MD. About 40 stakeholders representing academia, regulatory agencies, ingredient manufacturers, finished product manufacturers and trade associations participated either in person or via webinar.

USP Collaborates with Industry to Develop Quality Standards of Gummy Supplements

USP hosted a round table discussion to seek industry's input on the development of quality standards of gummy dietary supplements on March 3, 2016 at Rockville, MD. About 40 stakeholders representing major gummy manufacturers, ingredient manufacturers, contract laboratories and trade associations were invited to participate in the discussion.

GMP Compliance in Quality Operations for Dietary Supplements

U.S. Food and Drug Administration recently released 2015 cGMP inspection observations for dietary supplements. Among the observations, the major violations (close to 30%) were observed in the production and process control area followed by in the area of quality control (close to 12%). The FDA observations also indicate that 21CFR Part 111.70 and 75 in Subpart E remain challenging for DS manufacturers to fully comply with DS cGMP.
