Reference Standards Highlights

Below are several Tables with the latest Reference Standard information including out-of-stock items now available; new Reference Standards released in the last month; backordered items with estimated availability dates; items that have a new price and/or have a new package size; items with lots that are (or soon will be) no longer valid; and items with new lots since the last email notice.

Please contact your USP Customer Service Representative to place an order at +1-301-881-0666 or 1-800-227-8772. European customers can call 00-800-4875-5555. You can also order online at www.usp.org/products.

The Reference Standards Release Notification Service can be used to notify you when a new never-before-released Reference Standard becomes available. The Notification Service does not communicate the release of back-ordered items or lot changeovers. To participate, fill out the form online at www.usp.org/reference-standards/find-reference-standard/notification-service.

RS Lots That are No Longer Valid

These tables list previous RS lots that are (or will soon be) no longer valid for official use. If you still have any of these materials on hand, do not use them for compendial testing purposes after the last day of the month for the valid use dates listed. To test products, always be sure you use a current, valid lot of USP RS. Current lot numbers and valid use dates for previous lots are available in the USP Store online [here](#) using the Reference Standards: Alphabetical Listings to look up the item of interest.

Question of the Month

What does “AS” stand for on the label of a USP Reference Standard?

AS stands for Authentic Substance. Authentic Substances were developed by USP as a service primarily to analytical, clinical, pharmaceutical, and research laboratories. Such substances may be used for identification, method development, evaluation of method performance, or other applications as found suitable and validated by the user. AS Reference Standards do not have USP applications in monographs or other compendial standards. All available information can be found on the label of the AS Reference Standard. No additional data is publicly available.
