

**NOTICE:** Based on customer feedback, the format of the Reference Standards Tables has been changed to Excel. The actual tables will no longer be provided within a PDF file. Starting this month, a link will be included in this PDF file to open the tables as an Excel file. This allows our customers to sort and track relevant information easier. Each of the 9 reports has its own worksheet within the Excel file. We hope you find this change helpful!

## Reference Standards Info

For the most up-to-date lot information, visit the online [USP store](#) which is updated daily. USP recommends referring to the store prior to using a USP RS to assure the lot remains valid for use and to obtain the most up-to-date USP Certificate and Safety Data Sheet. Material Origin and Country of Origin details can also be obtained in the store.

USP strongly suggests downloading the [FREE Reference Standards and Resources APP](#) on your phone or tablet. The APP allows you to easily track lot changeovers by opting in to receive push notifications only for the USP RS's of interest.
