Ensuring Quality Hand Sanitizer Production During COVID-19 Seminar

Labeling, Packaging, Storage & Distribution: Ensuring Quality During Hand Sanitizer’s Journey

Misti Spann, Pharm.D.
February 2021
“Labels are fundamental to material identification… Labels applied, even to small containers, should be clear, indelible, unambiguous, and permanently fixed in the format established by the manufacturer, packager, or repackager.”

General Chapter <1079> Risks and Mitigation Strategies for the Storage and Transportation of Finished Drug Products
Labeling

“The term “labeling” includes all labels and other written, printed, or graphic matter on an article’s immediate container or on, or in, any package or wrapper in which it is enclosed, except any outer shipping container.”

General Chapter <7> Labeling

Label

“The term “label” is that part of the labeling on the immediate container.”

General Chapter <7> Labeling

- Quality manual: Yes
- Labeling: Yes
- Procurement: Yes
- Receiving: Yes
Receiving hand sanitizer ingredients

- Labels of hand sanitizer ingredients should align with current FDA requirements detailed in the *Temporary Policy for Preparation of Certain Alcohol-Based Hand Sanitizer Products During the Public Health Emergency (COVID-19) Guidance for Industry*.

- Specific details such as concentration and grade (e.g. USP, FCC) clearly stated on label and should be confirmed upon receipt.
Receiving hand sanitizer ingredients

- USP designation indicates that the product complies with a specific *USP-NF* monograph

- If complies with USP monograph it must have
  1. specific monograph name on label and
  2. any additional labeling requirements described in the specific monograph.

Example: **ISOPROPYL ALCOHOL (IPA) 99%, USP**
Labeling

Manufacture of hand sanitizer

- **Principal display panel** and **drug facts label** requirements in FDA Guidance
  - Principal display panel
    - Product name and strength, dosage form, identification, product description, volume of product in mL
  - Drug facts label includes
    - Active Ingredient(s), Use(s), Warnings, Directions, Storage Conditions, Other Information, and Inactive ingredients
Impact statement – purple

Manufacture of hand sanitizer – FDA Guidance

Principal display panel and drug facts label examples located in the Appendices of FDA Guidance document

- Appendix A. Labeling for Ethanol Formulation Consumer Use
- Appendix B. Labeling for Isopropyl Alcohol Formulation Consumer Use
- Appendix C. Labeling for Ethanol Formulation Health Care Personnel Hand Rub Use
- Appendix D. Labeling for Isopropyl Alcohol Formulation Health Care Personnel Hand Rub Use
Compounding hand sanitizer

“…expectation is that compounders follow USP General Chapter <795> Pharmaceutical Compounding – Nonsterile Preparations, including:

- The preparation to be appropriately labeled”¹

Follow specific labeling requirements according to the formulation

¹ United States Pharmacopeia (2020). Compounding Alcohol-Based Hand Sanitizer During COVID-19 Pandemic,
Shipping of Hand Sanitizer

**Outer Shipping Container**
- Product identification
- Lot number
- Wording or icons to emphasize:
  - Storage and transportation conditions
  - Handling requirements
  - Hazards
Labeling documentation according to the organization’s role in manufacturing or compounding of hand sanitizers.
